

FOREDOM[®] 500 Massager

Professional grade mechanical adjustment and therapeutic device used in multiple applications.

Capable of slow speeds as low as 100 strokes per min

With proper instruction and use, the ForeDOM massager can be used on a wide variety of therapies such as:

- Soft tissue (muscles)
- Bony structures (joints)
- Asthma
- Chronic pain
- Whiplash victims
- Colitis
- Stomach problems

"I have been using all versions of this motor since 1987. This is a remarkable piece of equipment that is powerful yet we can use it in very delicate situations. I only sell it to fellow physicians who have taken our courses. So it will not be improperly used. We truly respect the position that ForeDOM has in providing this instrument. To us it is a "Stradivarius" and not just any vibrator that is the current fad."

-Richard W. Koss, D.O.

Solid state electronic dial speed control in base provides a variety strokes **from 100 to 4,400 per minute**. Ideal for treatment and multiple types of therapies including E.L.F. (Extra Low Frequency) therapies.

Motor runs cool and quietly without gear chatter or noise.

Ball bearing, permanent magnet motor is totally enclosed, requires no lubrication and only minimal maintenance.

"The human body is composed of complex interflowing streams of moving energy. When these energy streams become blocked or constricted, we lose the physical, emotional and mental fluidity potentially available to us. It's a blockage last long enough or is great enough, the result is pain, discomfort, illness, and distress."

-Robert C Fulford, D.O.
