

Power Cord Plug Options for 230 Volt Flex Shaft Motor-Speed Control Combinations, Micromotors and Bench Lathes

Unless specified, standard 3-prong US style plugs come supplied on all 230V Speed Controls, except CE compliant models C.FCT-21CE & C.FCT-22CE. The US style plug is indicated by a **-2** after the Part Number, e.g. **K.2230-2**. Non US plugs are available at same price.

Add **-21**, **-22** or **-26** to Part No. when Specifying a Non-US Plug (Same Price): e.g. **K.2230-21** (UK Plug), **K.2230-22** (Continental European Plug), **K.2230-26** (Australian Plug).

Add **-21CE** to Part No. when Specifying a CE Compliant Model for use in UK.

Add **-22CE** to Part No. when Specifying a CE Compliant Model for use in Continental Europe.

CE compliant models apply ONLY to Series SR Motors and are available at an added cost. CE compliant models come with a specialized C.FCT-21CE or C.FCT-22CE Speed Control in place of our standard speed control: e.g. **K.2230-21CE (CE Compliant Kit with UK Plug) & **K.2230-22CE** (CE Compliant Kit with Continental European Plug).**
