

## Loading Split Sandpaper Mandrels

Split Sandpaper Mandrels are used with cloth backed paper that comes in various grits. Use the template to cut pieces of the desired grit sandpaper. Slip the notched end into the slot in the mandrel and tightly wind the paper onto the mandrel with the grit side out. Then glue the final edge of the roll with super glue. Use a double twisted rubber band around the roll of paper to hold it in place while the glue dries. It is important to use this accessory at 12,000 rpm or lower for refined sanding and smoothing.
